	Introduction	2	4 Life Sciences and biotechnology	156
	<i>Technologies and the future</i>			
1	Materials and components	6		
	Metals	8	Industrial biotechnology	158
	Ceramics	14	Plant biotechnology	162
	Polymers	18	Stem cell technology	166
	Composite materials	24	Gene therapy	170
	Renewable resources	30	Systems biology	174
	Wood processing	34	Bionics	178
	Nanomaterials	38		
	Surface and coating technologies	42	5 Health and Nutrition	184
	Intelligent materials	48		
	Testing of materials and structures	52	Intensive care technologies	186
	Materials simulation	56	Pharmaceutical research	190
	Self-organisation	60	Implants and prostheses	196
			Minimally invasive medicine	202
			Nanomedicine	206
			Medical imaging	210
			Medical and information technology	216
			Molecular diagnostics	222
			Assistive technologies	226
			Food technology	230
2	Electronics and photonics	64		
	Semiconductor technologies	66	6 Communication and knowledge	236
	Microsystems technology	72		
	Power electronics	78	Digital infotainment	238
	Polymer electronics	84	Ambient intelligence	244
	Magneto-electronics	88	Virtual and augmented reality	250
	Optical technologies	92	Virtual worlds	256
	Optics and information technology	98	Human-computer cooperation	262
	Laser	104	Business communication	268
	Sensor systems	110	Electronic services	272
	Measuring techniques	114	Information and knowledge management	276
3	Information and communication	120	7 Mobility and transport	282
	Communication networks	122		
	Internet technologies	128	Traffic management	284
	Computer architecture	134	Automobiles	288
	Software	140	Rail traffic	294
	Artificial intelligence	146	Ships	300
	Image evaluation and interpretation	150	Aircraft	304
			Space technologies	310

8	Energy and Resources	316	12	Production and enterprises	462
	Oil and gas technologies	318		Casting and metal forming	464
	Mineral resource exploitation	324		Joining and production technologies	470
	Fossil energy	330		Process technologies	476
	Nuclear power	334		Digital production	482
	Wind, water and geothermal energy	340		Robotics	486
	Bioenergy	346		Logistics	492
	Solar energy	352			
	Electricity transport	358	13	Security and Safety	496
	Energy storage	362		Information security	498
	Fuel cells and hydrogen technology	368		Weapons and military systems	504
	Microenergy technology	374		Defence against hazardous materials	510
9	Environment and Nature	380		Forensic science	516
	Environmental monitoring	382		Access control and surveillance	522
	Environmental biotechnology	388		Precautions against disasters	528
	Water treatment	394		Disaster response	532
	Waste treatment	398		Plant safety	536
	Product life cycles	402		Sources of collage images	540
	Air purification technologies	406		Subject index	541
	Agricultural engineering	410			
	Carbon capture and storage	416			
10	Building and living	420			
	Building materials	422			
	Structural engineering	426			
	Sustainable building	432			
	Indoor climate	436			
11	Lifestyle and leisure	440			
	Sports technologies	442			
	Textiles	446			
	Cosmetics	450			
	Live entertainment technologies	454			
	Domestic appliances	458
