eHealth and Bioeconomy

InnoHealth China promotes your ideas

InnoHealth China is the current campaign led by the Fraunhofer-Gesellschaft and constituent part of the initiative Research in Germany which is initiated and financed by the Federal Ministry of Education and Research (BMBF). The campaign aims to connect the Chinese and the German healthcare research sectors, also involving small and medium-sized enterprises (SME) and start-ups. Applying for the Call for Ideas & Innovation until December 16, 2019, you may get the chance to be part of an international network and to learn about realizing your project.

InnoHealth China's Call for Ideas & Innovation addresses representatives from research organizations and those from SMEs and start-ups who develop application-oriented technologies and/or processes in the fields of eHealth - with the subtopics Artificial Intelligence and Telemedicine - and Bioeconomy - with Bioeconomy, Biotechnology & Drug Discovery, Precision Healthcare and Healthy Food. The campaign intends to initiate and strengthen project development with Chinese research institutions and companies, which is why the Fraunhofer-Gesellschaft is offering an exclusive delegation trip, the Matchmaking Tour, to China, for the winner of the Call. These winners, a total of 10 German Research-SME-Tandems, will also participate in a workshop for promoting research and find out about possible funding programs. In addition, the German participants may invite their Chinese partners for the German R&D Tour to Germany in order to continue their cooperation dialogues.

InnoHealth China

The campaign InnoHealth China is the first of three within Research in Germany. Two more campaigns - each of them focussing on different topics and regions - will follow until 2023. More about the campaign, the call and the application documents can be found on: www.research-in-germany.org/innohealth/call

Research in Germany

The initiative „Research in Germany“ is launched and financed by the Federal Ministry of Education and Research (BMBF) serving to promote Germany's research landscape and its latest research achievements across the world. This central marketing is conducted by the German Academic Exchange Service, the German Research Foundation, the Fraunhofer-Gesellschaft and the International Office of the BMBF.
