

YOUR BENEFITS AT A GLANCE

- >>> Ongoing professional development
- >>> Ready for implementation in your current job
- >>> Minimal classroom-based component promotes work/life balance and learning
- >>> Up-to-date Fraunhofer research knowledge integrated into business practice
- >>> New career opportunities with recognized qualifications
- >>> Advanced access to new technologies
- >>> Tools to develop new products, processes and services
- >>> Gain competitive advantage through Fraunhofer-Gesellschaft networks

ADVANCED TRAINING WITH FRAUNHOFER

If you have any queries or require further information about any of our programs, do not hesitate to contact the Fraunhofer Academy team.

COURSES AT THE FRAUNHOFER ACADEMY

CHOOSE FROM FIVE THEMATIC AREAS

ADVANCED TRAINING – THE FRAUNHOFER APPROACH

The Fraunhofer Academy is the Fraunhofer-Gesellschaft's specialist provider of continuing education and part-time training for people in employment. It was founded in 2006 to promote the transfer of knowledge from Fraunhofer institutes' research to private companies. Through a range of training programs, the Fraunhofer Academy passes current Fraunhofer institutes' research knowledge and expertise on to private sector business enterprises seeking to provide their employees with the best possible qualifications. After all, applied research is only useful if new research finds its way into industry and is then turned into innovations. This is the only way companies can remain competitive in the global market.

In cooperation with renowned partners and partner universities, the Fraunhofer Academy offers part-time study programs, certificate courses and multi-day seminars.

The Fraunhofer Academy's continuing education portfolio is divided into five topic areas: technology and innovation, energy and sustainability, information and communication, manufacturing and testing technology, and logistics and production.

Create the foundation for your next career move!

Best wishes,

Dr. Roman Götter, Managing Director of the Fraunhofer Academy

TECHNOLOGY AND INNOVATION

Executive MBA from RWTH Aachen University
Intellectual Capital Statement – Made in Germany*
Technology and Innovation Management I+II

ENERGY AND SUSTAINABILITY

Master Online Photovoltaics*
infernum – interdisciplinary distance learning program for environmental sciences
University Qualification in Environmental Management
MASTER:ONLINE Building Physics
Online M.Sc. Wind Energy Systems*
Electromobility
Solar Energy Engineering*
Energy System Technology

MANUFACTURING AND TESTING TECHNOLOGY

Master Automotive Production Engineering
Fiber Composite Technology*
Industrial Adhesive Bonding Technology*
Non-destructive Testing
Joining Technology in Electronics
Cleaning Technology

INFORMATION AND COMMUNICATION

Master Software Engineering for Embedded Systems*
Software Architecture
TeleTrusT Information Security Professional (T.I.S.P.)
Usability Engineer
Roberta® Teacher Training
Requirements Engineering
Data Scientist Training Series*

LOGISTICS AND PRODUCTION

Diploma in Supply Chain and Logistics Management (DAS)
MASTER:ONLINE in Logistics Management
Bachelor of Science in Logistics Management
Value Stream Engineering
Lean Logistics
Master Industrial Production Management
Inventory Management
Variation Management

*Programs available in English
